

"SPEND EACH DAY TRYING TO BE A
LITTLE WISER THAN YOU WERE WHEN
YOU WOKE UP."

— CHARLIE MUNGER (1924 - 2023)

Agenda :

- ① Discuss the use case
- ② Exploring Data and Data Wrangling
- ③ Defining Output Metrics
- ④ Logic Implementation & Optimisation
- ⑤ Productionize

If time permits

- ① Tungsten Project and Execution Engine

Request: Feedback

Use Case

The Business Intelligence "Health" Dashboard

Task

- Create a single aggregated table that provides daily snapshot of platforms overall performance and user engagement

Answers

- ① What happened yesterday?
- ② How are we trending?

Metrics to compute

- ① Daily Active Users : Count of unique users who performed any action
- ② Engagement by Action : Total count for each action
- ③ Total time spent : Total time spent on platform on given Date
- ④ Engagement by Region : DAU by user region
- ⑤ Views Per category : Categories of article and total distinct views

Exploring Data and Data Wrangling

- User profile
- Article metadata
- User Activity

Basic Data Wrangling or Data cleaning

- ✓ ① Fixing Datatypes for each of the column
- ✓ ② Summarizing all important columns to understand ranges
- ✓ ③ Handling NULL values
- ✓ ④ Fixing any mistyped values
- ✓ ⑤ Handling Invalid Inputs
- ✓ ⑥ check for any duplicates finally

Break : 10:12 pm

HP1 10:20 pm

Defining Output Metrics

pipeline	DAU	Total time	Engagement	Engagement	views per
DT		Spent	by Action	by Region	Category
